While recognizing that employees need gloves to safely perform many job duties, we also recognize that disposable gloves pose very serious risks for individuals, who may try to such, chew or swallow the gloves due to their intellectual disabilities. With this in mind, it is extremely important for the safety and welfare of the people who live at this facility that all employees fully know what is expected of them regarding handling of gloves and the consequences for failing to act in a responsible manner. The facility policy on safe handling of gloves includes detailed information regarding procedures for storage and disposal of gloves. The following principles are taken from the policy and must be followed by every employee who works at this facility including all **contract employees**, students and volunteers.

- A. Unused gloves are always stored in designated areas that remain locked at all times.
- B. Gloves are not stored in bedrooms under any conditions.
- C. Used gloves are disposed of immediately in designated glove boxes. Always remember used gloves go into a plexiglass hole.
- D. When the used glove boxes are full, they are emptied into a covered, universally labeled trashcan that is in a location designated solely for the disposal of liners containing used gloves taken from the glove boxes.

- E. No other waste will be placed in the covered, universally labeled trashcan other than used gloves.
- F. No loose gloves will be placed in the designated trashcans.

The contract administrator will review the glove disposal policy with the contractor and have the contractors employees take and pass the glove disposal test. The contractor will be responsible for gathering all employees that will provide on-site service under this contract so that the review and test can be performed one time for all applicable employees.
